

Cockpit

Cockpit not only supports the traceable correction workflow with Adobe InDesign, but is a server-based system for planning, controlling, managing and monitoring the publishing process!

The planning, managing and monitoring of a publication takes place within a browser application.

The correction workflow takes place within a browser application and Adobe InDesign.

Controlling can be done via browser application, email client and Adobe InDesign with Xactuell.

With Cockpit, controlling a distributed publishing team, even across multiple locations, is a breeze.

First installation: 2015
