

sellyo®

sellyo® is a highly intuitive B2B tool that allows non-specialists to get enthusiastic about brand communication. CHILI Publisher, the “hottest online document editor”, is already used widely and successfully in many countries as a rendering engine, but has never before been integrated into a comprehensive Web2Print solution.

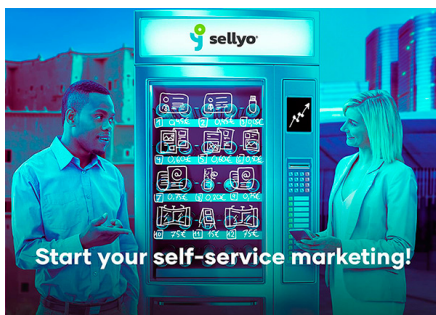

With sellyo® Laudert offers a comprehensive Web2Print system with a CHILI core, including a shop function based on OXID e-sales.
