

# d-serv | consistent software solutions

In addition to the development and distribution of its own web-to-publish solution ci-book™, d-serv GmbH has been able to bring other software solutions to the market with the support of its cooperation partners and through funding at state and federal level.

In particular, AI-supported systems, such as the "Virtual Planning Office" (BauKI), through which representations and information on construction plans can be recorded and evaluated, now play a central role.

Thus, d-serv GmbH can offer the following cross-sector and web-based software solutions, among others:

1. ci-book™ Web-To-Publish for marketing, sales, support and human resources.
2. virtual planning office (BauKI) for AI-supported evaluation and categorisation of construction plans for architecture/construction planning offices, building authorities etc.

The IT services of d-serv GmbH also include the following core areas:

1. project consulting / organisation
2. software development / implementation / training / maintenance
